At ASBİLEK, we see enhancing energy efficiency, continuously improving our energy performance, and reducing our environmental impact at every stage of our production processes as a core responsibility.

As an industrial company operating in circular saw blade production, we aim to develop sustainable and innovative solutions in energy-intensive processes. We adopt an energy management approach that is efficient, safe, and environmentally conscious, in collaboration with all our stakeholders.

Within this scope, we commit to:

- Regularly monitoring, measuring, and evaluating our energy consumption to continuously improve our energy performance,
- Investing in technologies that enhance energy efficiency and preferring energy-efficient equipment,
- Developing practices to prevent energy losses in our production processes,
- Ensuring full compliance with all legal and other obligations related to energy,
- Conducting training and awareness activities to inform our employees and stakeholders about energy efficiency,
- Setting energy targets and monitoring performance transparently,
- Implementing decisions made under the energy management system in an integrated manner across all departments, from top management to field workers,
- Supporting renewable energy sources and evaluating suitable alternatives to diversify energy resources,
- Encouraging energy management practices that contribute to reducing carbon emissions in the fight against climate change.

We pledge to uphold these commitments.

General Manager
